

Preface.....	ix
---------------------	-----------

Introduction

1 Introduction.....	3
1.1 About the Torque Game Engine.....	3
1.1.1 What Is Torque?.....	3
1.1.2 Why Should I Use Torque?.....	3
1.1.3 Not Just First-Person Shooters.....	4
Current Titles.....	4
Upcoming Titles.....	5
1.2 What This Guide Contains.....	6
1.2.1 Summary.....	6
1.3 What This Guide Does Not Contain.....	8
1.4 What You Should Know Before Reading This Guide.....	8
1.5 How To Obtain Torque (Licensing Torque).....	9
1.6 Getting Started, One Step at a Time.....	10
1.7 The GarageGames Community and Resources.....	10
1.8 Conventions.....	10
1.8.1 Icons Legend: Warnings, Notes, and Expert Tips.....	11
1.8.2 Game-Building Lessons.....	11
Combined Lessons Appendix.....	11
Skip Ahead!.....	11

Engine Overview

2 Torque From 10,000 Feet.....	15
2.1 TGE Terms and Concepts.....	15
2.1.1 Shapes and DTSs (TGE Term).....	16
Non-DTS Renderers?.....	16
Shapes in Our Game.....	16
2.1.2 Interiors and DIFs (TGE Term).....	17
2.1.3 Convex vs. Concave (Industry Term).....	18
2.1.4 Convex Brush (Industry Term).....	19
2.1.5 Level of Detail (Industry Term).....	19
2.1.6 Collision Detection, or COLDET (Industry Term).....	19
Collisions in Our Game.....	20
2.1.7 Portals (Industry Term).....	20
2.1.8 Animations: Blended vs. Non-Blended (Industry Term).....	20
2.1.9 Image File Lists, or IFLs (TGE Term).....	21
2.1.10 Callbacks (Industry Term).....	21
callbacks in Our Game.....	21
2.1.11 2D and 3D Sound (Industry Term).....	22
Sounds in Our Game.....	22
2.1.12 Missions (TGE Term).....	22
Do I Have to Use Missions?.....	23
How Big Can a Mission Be?.....	23
Missions in Our Game.....	23
2.1.13 Event-Driven Simulator (Industry Term).....	23
2.1.14 Ticks (TGE Term).....	24
2.1.15 Client-Server Architecture (Industry Term).....	24
Why Use a Client-Server Architecture?.....	25
The TGE Client-Server Modes and Connection Schemes.....	25
Master Servers (Industry Term).....	27
TGE Client-Server Division of Labor.....	27

Client-Server Communications.....	27
2.1.16 Objects (Industry Term).....	28
2.1.17 Ghosts, Control Objects, and Scoping (TGE Terms).....	28
2.1.18 Datablock (TGE Term).....	29
2.2 Finding Your Assets.....	30
2.2.1 Finding Assets – TGE FPS Starter Kit.....	30
2.2.2 Finding Assets – Included Lesson Kit.....	31
2.3 Sim Hierarchy Overview.....	31
2.4 TGE I/O Fundamentals.....	32
2.4.1 TGE Device Input Architecture.....	32
ActionMaps.....	33
ActionMaps in Our Game.....	33
Processing Stack.....	33
2.4.2 TGE File I/O.....	33
File I/O and String Manipulation in Our Game.....	34
2.5 Move Along... Nothing to See Here... Move Along.....	34
 3 Torque Tools.....	 35
3.1 What We Are About to Learn.....	35
3.2 Torque’s Basic Editors.....	35
3.3 The World Editor Tools.....	36
3.3.1 World Editor Basics.....	36
3.3.2 World Editor Devices.....	36
3.3.3 Cursors.....	37
3.3.4 The Gizmo and Gizmo Scales.....	37
3.3.5 Menus and Windows.....	38
3.3.6 Selection Boxes.....	38
3.3.7 The Handle and Level Grid.....	39
3.3.8 Scale Devices.....	40
3.4 World Editor Mechanics.....	40
3.4.1 Default Movement and Viewpoint.....	40
3.4.2 Object Selection and Translation.....	41
3.4.3 Using the Gizmo.....	41
3.4.4 Scaling Using Bounding-Box Planes.....	42
3.5 World Editor (Manipulator).....	43
3.5.1 Starting the Manipulator.....	43
3.5.2 The 3D World View Windows.....	43
3.5.3 World Editor Menus.....	43
3.6 World Editor Inspector (Inspector).....	47
3.6.1 Starting the Inspector.....	47
3.6.2 Examining the Inspector.....	47
3.6.3 World Editor Tree.....	47
Locked Items.....	49
3.6.4 SimGroups.....	49
Moving Existing Objects into a SimGroup (Add-Group or Instant Group).....	50
Creating Objects in a Preexisting SimGroup (Add-Group).....	50
3.6.5 World Editor Key Stroke/Mousing List.....	50
3.6.6 World Editor Inspector Window.....	50
Inspector – Common Fields.....	51
Inspector – Dynamic Fields.....	51
3.7 World Editor Creator (Creator).....	52
3.7.1 Starting World Editor Creator.....	52
3.7.2 World Editor Creator Window.....	52
Placing (Creating) New Objects.....	53
Adding Objects to Creator Tree.....	53
Adding Interiors to the Creator Tree.....	53
Adding Static Shapes to the Creator Tree.....	54

3.8 Mission Area Editor (Area Editor)	55
3.8.1 Starting the Mission Area Editor	55
3.8.2 The Mission Area Editor Window	55
Editing the Mission Area	55
Mirroring the Mission Area	57
3.9 Terrain Editor	57
3.9.1 Starting The Terrain Editor	57
3.9.2 The Terrain Editor Window	57
The Over Vertex Brush Scale	58
The Selected Brush Scale	58
3.9.3 Editing	59
Editing in Brush Mode	59
Basic Brush Editing Actions	60
Selection in Brush Mode	60
Brush Hardness	61
Terrain Editor Settings	61
Selection and <Radius>	62
3.10 Terrain Terraform Editor (Terraformer)	63
3.10.1 Starting the Terraformer	63
3.10.2 The Terraformer (An Overview)	63
3.10.3 The Terraformer Preview Window	64
3.10.4 Terraformer Operations Tree	64
Terraformer Operations	64
How Operations Are Applied`	66
Operations' Settings	66
General	66
fBm Fractal	66
Rigid MultiFractal	66
Canyon Fractal	67
Sinus	67
Turbulence	68
Smoothing	68
Smooth Water	68
Smooth Ridges/Valleys	68
Filter	69
Thermal Erosion	70
Hydraulic Erosion	70
Blend	71
Loading a Bitmap	71
Loading a Terrain File	72
3.10.5 Maze Runner Lesson #1 (90 % Step) – Terrain for Our Game	72
Copy Required Files	72
Generate New Terrain	72
Adjust Spawn Point	72
3.11 Terrain Texture Editor	73
3.11.1 Starting the Terrain Texture Editor	73
3.11.2 The Terrain Texture Editor Preview Window	73
3.11.3 The Texture Editor Textures List (Loading Textures)	74
3.11.4 Terrain Texture Editor Operations	74
Fractal Distortion (Base Filter)	74
Place by Fractal	75
Place by Height	75
Place by Slope	75
Place by Water Level	75
3.12 Terrain Texture Painter (Terrain Painter)	77
3.12.1 Starting the Terrain Texture Painter	77
3.12.2 Examining the Terrain Painter	78

The Terrain Painter Palette.....	78
Fixing Broken Terrain Paths (All White Terrain).....	79
3.13 World Editor Quick Tips.....	80
3.13.1 Manipulator (F11 + F2) Tips.....	80
3.13.2 Inspector (F11 + F3) Tips.....	80
3.13.3 Creator (F11 + F4) Tips.....	80
3.13.4 Area Editor (F11 + F5) Tips.....	81
3.13.5 Terraformer (F11 + F7) Tips.....	81
3.13.6 Terrain Painter (Windows -> Texture Painter) Tips.....	81
3.13.7 General Editing Tips.....	81
3.14 The GUI Editor.....	82
3.14.1 Starting the GUI Editor.....	82
3.14.2 Examining the GUI Editor.....	82
3.14.3 Things to Beware!.....	83
3.14.4 GUI Editor Basics.....	84
GUI Editor Devices.....	84
3.14.5 Control Manipulation.....	86
Add Parents.....	89
GUI Navigation.....	89
3.14.6 Adding Controls to an Existing GUI.....	90
horizSizing and vertSizing.....	91
3.14.7 Creating a New (Parent) GUI.....	92
The Parent.....	92
The Dialog.....	92
3.14.8 Loading New GUIs.....	93
3.14.9 Summary.....	94
4 Introduction to TorqueScript.....	97
4.1 TorqueScript Concepts and Terminology.....	97
4.1.1 To Script or Not To Script?.....	97
What Is Scripting?.....	97
4.1.2 Features We Need.....	99
4.2 What About TorqueScript?.....	100
4.2.1 The Console and Sample Scripts.....	100
4.2.2 The Sample Script Console.....	101
4.3 TorqueScript Features.....	102
4.3.1 Variables.....	104
4.3.2 Data Types.....	106
Numbers.....	106
Strings.....	106
String Operators.....	107
Escape Sequences.....	107
Booleans.....	108
Arrays.....	109
Vectors.....	110
Bad Vector Math.....	111
4.3.3 Operators.....	111
4.3.4 Control Statements.....	112
Branching Structures.....	112
Looping Structures.....	113
4.3.5 Functions.....	114
4.3.6 Objects.....	115
Handles and Names.....	118
Fields and Console Methods.....	118
Dynamic Fields.....	119
4.3.7 Console Methods.....	120
4.3.8 Packages.....	122

4.3.9 Namespaces.....	126
4.3.10 Datablocks.....	127
The Object-Datablock Connection.....	127
Creating Non-Datablock-Based Objects.....	129
Creating Datablock-Based Objects.....	129
Declaring Datablocks.....	130
Accessing Datablock Fields.....	132
Maze Runner Lesson #2 (90% Step) – Loading Datablocks.....	132
4.4 Datablocks, Objects, and Namespaces Revisited.....	133
4.4.1 Object Namespace Hierarchies.....	133
4.4.2 Simple Datablock Namespaces.....	134
4.4.3 Inserting Datablock Namespaces (ClassName).....	136
4.4.4 Namespace Inheritance?.....	138
4.4.5 A Parting Reminder (Datablock versus Object Namespaces).....	139
4.4.6 Helping Yourself.....	139
4.5 Summary.....	140

Game Elements

5 Torque Core Classes.....	143
5.1 SimObject.....	143
5.1.1 SimObject Features.....	143
5.1.2 SimObject Description.....	144
5.1.3 Name and ID, Please.....	144
5.1.4 Class Name and Type Information.....	145
5.1.5 Saving and Deleting.....	147
5.1.6 Dumping Information.....	147
5.1.7 Group Membership.....	147
5.1.8 SimObject Methods.....	148
5.2 SimDataBlock.....	148
5.2.1 SimDataBlock Features.....	148
5.2.2 Datablock-Object Pairing.....	149
5.2.3 Namespace Rules.....	149
Chaining and Building.....	149
Noninheritable.....	150
Scoping.....	151
5.3 SceneObject.....	151
5.3.1 SceneObject Features.....	151
5.3.2 SceneObject Description.....	152
5.3.3 Position, Rotation, and Scale.....	152
5.3.4 The Transform.....	153
5.3.5 Collision Detection.....	153
5.3.6 Object Boxes and World Boxes.....	154
5.3.7 The Forward Vector.....	154
5.4 GameBase and GameBaseData.....	155
5.4.1 GameBase Features.....	155
5.4.2 The Foundation Game Classes.....	155
5.5 Summary of Core Classes.....	156
6 Basic Game Classes.....	157
6.1 Shape and Interiors.....	157
6.1.1 Shapes.....	157
6.1.2 Interiors.....	158
6.2 ShapeBase/ShapeBaseData.....	158
6.2.1 ShapeBase and ShapeBaseData Features.....	158
6.2.2 Rendering.....	158

Environmental Mapping.....	160
Cloaking.....	160
Fading and Hiding.....	160
Skins.....	161
6.2.3 Damaging, Disabling, Destroying, and Exploding!.....	162
Damaging.....	162
Setting Up Repairs.....	162
Damaging.....	163
Repairing Manually.....	163
Damage States.....	163
Invincibility.....	164
Postdestruction Rendering.....	165
Damage Flashes and Whiteouts.....	165
Explosions.....	166
Debris.....	166
6.2.4 Energy.....	166
6.2.5 Physical Parameters.....	167
Velocity.....	167
Impulses.....	167
Varying Impulse Position.....	168
6.2.6 Eye Transforms and Vectors.....	168
6.2.7 Camera Settings.....	169
6.2.8 Animations.....	169
Cyclic Animations.....	169
Playing.....	169
Direction.....	170
Pausing and Stopping.....	170
Animation Oddities.....	170
Noncyclic Threads Remain in Play State at End of Sequence.....	170
Damage Animations.....	171
"Visibility" Sequence.....	171
"Damage" Sequence.....	171
6.2.9 Sound`.....	172
6.2.10 Mounting.....	172
Things to Know.....	173
Mounting Shape-to-Shape.....	173
Mounting Image-to-Shape.....	174
6.2.11 Miscellaneous – CRC and aiAvoidthis.....	175
6.3 Item and ItemData.....	175
6.3.1 Item and ItemData Features.....	175
6.3.2 Item Rendering.....	176
Lights, Camera,... Action.....	176
6.3.3 Item Physics.....	177
Static Items.....	177
Rotating Items.....	177
Bouncy Items.....	178
Maximum Velocity (maxVelocity).....	178
Sticky Items.....	178
Sliding Items.....	179
Modifying Gravity (gravityMod).....	179
6.3.4 Item Collisions.....	180
Collision Timeout.....	180
6.3.5 Items and dynamicType.....	180
6.3.6 Maze Runner Less #3 (90% Step) – Game Coins.....	181
Copy Required Files.....	181
Coin Geometry.....	181
The Coin Datablock.....	181

The Coin onAdd()	182
Testing	183
6.4 StaticShape and StaticShapeData	183
6.4.1 StaticShape and StaticShapeData Features	183
6.4.2 Powered State	184
6.4.3 dynamicType	184
6.4.4 Maze Runner Lesson #4 (90% Step) – Fade and Fireball Blocks	184
Copy Required Files	184
Block Geometry	185
Reskinning	185
Self-Illuminating	185
Datablocks	185
Fade Blocks Datablock	186
Fireball Blocks Datablock	186
6.5 TSStatic	187
6.5.1 TSStatic Features	187
6.5.2 Rendering	187
6.5.3 Collision	187
6.5.4 Creating TSStatic Shapes	187
6.5.5 Moving and Scaling	188
6.5.6 Maze Runner Lesson #5 (90% Step) – Maze Blocks	188
Block Geometry	188
Placing Blocks	189
Examine the Blocks	189
6.6 ShapeBaseImageData (Images)	189
6.6.1 ShapeBaseImageData Features	189
6.6.2 Rendering Options	190
POV and Offsets	190
Lighting	191
6.6.3 Mounting	191
6.6.4 Weapon-Related Features	191
6.6.5 State Machines	192
States	192
Defining States	193
Required States?	193
Transitioning	193
Making States Do Work	194
Running Animations	195
Running Scripts	195
Physical Parameters	196
Collisions	196
Image Animations	196
ambient Sequence	196
6.6.6 InteriorInstance	197
Terrain Inside	197
Activating and Deactivating Lights	197
Using alarmMode	197
Levels of Detail	198
Manual LOD	198
Disabling LOD	198
Mirrors	198
6.7 Summary	198
7 Gameplay Classes	201
7.1 Gameplay?	201
7.2 Camera and CameraData	201
7.2.1 Camera and CameraData Features	202

7.2.2 Parts of the Whole.....	202
The Control Object (An Aside).....	205
FOV and Zoom Console Functions.....	205
The Globals.....	206
GameConnection::setFirstPerson().....	206
Camera Methods.....	207
ShapeBaseData Fields.....	207
The FOV and Distance Fields.....	207
observeThroughObject.....	208
firstPersonOnly.....	208
useEyePoint.....	208
ShapeBase Methods.....	208
PlayerData Fields.....	208
minLookAngle/maxLookAngle (Pitch).....	208
maxFreeLookAngle (Yaw).....	209
VehicleData Fields.....	209
Lagging.....	210
Offset.....	210
Your Meshes and Special Nodes.....	210
7.2.3 Basic Game Views Cookbook.....	210
1st POV Only – Standard (90-Degrees) FOV.....	211
Forcing 1st POV Only – Alternate Method.....	211
Forcing 3rd POV Only.....	211
1st or 3rd POV Capable.....	212
Enabling Orbit Mode.....	212
Use Vehicle’s Eye Node on Mount.....	213
7.3 Player and PlayerData.....	213
7.3.1 Player Rendering (POV).....	214
renderFirstPerson.....	214
7.3.2 Player Special Effects.....	214
Foot Puffs and Footprints.....	215
Splashes and Bubbles.....	216
Sounds and Sound Modifiers.....	217
Property Maps.....	217
7.3.3 Player Physics.....	217
Forces and Factors.....	217
Resist Factors.....	219
Recovery Delays.....	219
Impacts.....	220
General Impacts.....	220
Impacts with the Ground.....	220
Impacts and Recovery (Mode).....	220
Step Height.....	220
7.4 Controlling The Player.....	221
7.4.1 Movement Globals.....	221
Translations.....	221
Keyboard Rotations.....	222
Mouse Rotations.....	222
7.4.2 The MoveMap.....	222
7.4.3 Maze Runner Lesson #6 (90% Step) – Simplest Player.....	223
Copy Required Files.....	223
Simplest Player Skeleton.....	223
Root Node.....	224
Eye and Cam Nodes.....	224
Simplest Player Geometry.....	224
Visible Mesh.....	224
Collision Mesh.....	224

Simplest Player Animations.....	224
Simplest Player's Datablock.....	226
Loading the Datablock.....	226
Using This Player.....	227
7.5 Vehicles.....	227
7.5.1 Vehicles Overview.....	227
Vehicle Geometries (Meshes).....	227
General Vehicle Nodes.....	228
Vehicle Animations.....	228
7.5.2 Vehicle and VehicleData.....	231
Vehicle Physics.....	231
Integration.....	231
Friction and Restitution.....	231
contactTol and collisionTol.....	232
massBox and massCenter.....	232
minDrag and maxDrag.....	232
Steering.....	232
Jetting.....	232
Impacts and Impact Sounds.....	233
The Camera.....	233
collDamage Fields.....	233
7.5.3 Vehicle Mounting.....	233
Mounting Vehicles.....	233
Mounting Dynamic Fields.....	235
Dismounting Vehicles.....	235
Vehicle Action Maps.....	235
7.5.4 Wheeled Vehicles.....	236
WheeledVehicleData and WheeledVehicle.....	236
The Engine.....	236
Braking.....	236
The Wheels.....	236
Sounds.....	236
WheeledVehicleTire.....	237
Friction.....	237
Longitudinal Forces and Factors.....	237
Lateral Forces and Factors.....	238
Physical Parameters.....	238
Restitution.....	238
WheeledVehicleSpring.....	238
Upward Force and Damping.....	238
The Anti-Sway Effect.....	239
Length of Travel.....	239
Powered Wheels.....	239
7.5.5 Hover Vehicles.....	240
HoverVehicleData and HoverVehicle.....	240
Horizontal Motion.....	240
Drag.....	240
vertFactor and FloatingThrustFactor.....	240
Floating Gravity.....	241
Hovering.....	241
Jetting Around.....	241
Stabilizers.....	241
Rolling and Pitching.....	241
Keeping the Vehicle Upright.....	242
Steering.....	242
Stay Put!.....	242
Special Effects.....	242

7.5.6 Alternate Mounting Positions.....	242
7.6 Inventories.....	243
7.7 The Simple Inventory System (SimpleInventory).....	245
7.7.1 Designing SimpleInventory.....	245
Inventory Builder.....	245
Specifying Stored Objects.....	246
Initial Contents.....	246
Limiting Inventory Counts.....	247
Remaining Basic Features.....	247
7.7.2 Using SimpleInventory.....	248
SimpleInventory Callback Flows.....	248
Picking Up Objects.....	248
Throwing/Dropping Inventoried Objects.....	250
Using Inventoried Objects.....	251
Item-Specific Responses.....	252
Pickup Substitutions.....	252
Variable Pickup Values.....	252
Variations on onPickup().....	253
Alternate to onPickup().....	254
Non-Pickup Variations.....	254
Constraining SimpleInventory.....	254
7.7.3 General Inventory Tips and Gotchas.....	255
7.7.4 Inventory Validation.....	256
7.7.5 Maze Runner Lesson #7 (90% Step) – Preparing Our Game Inventory...	256
Loading the Inventory System.....	256
Adding an Inventory.....	257
Removing an Inventory.....	258
What About Constraining?.....	258
In Review.....	259
7.8 Gameplay Classes Summary.....	259
 8 Mission Objects.....	 263
8.1 Mission Objects.....	263
8.2 Terrain.....	263
8.2.1 Terrain Features.....	264
8.2.2 The Detail Texture.....	264
8.2.3 Bump Mapping.....	265
8.2.4 More About Terrain Painting.....	267
8.2.5 Alternate Terrain Sizing.....	267
Modifying squaresize.....	267
Atlas.....	268
8.2.6 Big Terrains: Don't Do It!.....	268
8.2.7 No Terrain?.....	269
8.3 Water (Blocks).....	269
8.3.1 Basic Water (Quick Setup).....	270
8.3.2 Water Features.....	270
8.3.3 Advanced Water.....	271
Position and Scale.....	271
The Various Textures (Media).....	272
Makin' Waves.....	272
Sinking and Floating.....	273
Liquid Types.....	273
Underwater Fog.....	274
Water Flow.....	274
Water Distortion.....	275
Realistic Shoreline Rendering.....	275
Reflections and Specular Masks.....	276

Texture Scaling.....	277
Tying Up Loose Ends.....	277
8.3.4 Maze Runner Lesson #8 (10% Step) – Lava in the Cauldron.....	278
8.4 Sky.....	279
8.4.1 Sky Features.....	279
8.4.2 The DML File.....	279
8.4.3 The Sky Box and Render Bans.....	280
8.4.4 Clouds.....	281
cloudHeightPer.....	281
Multiple Layers.....	281
Cloud Motion.....	281
8.4.5 Fog.....	282
General Fog.....	282
Fog Layers.....	282
8.4.6 Visibility.....	282
8.4.7 Rendering Issues.....	283
8.4.8 Sky Scripting.....	283
Storm Fog.....	283
Storm Clouds.....	284
8.4.9 Maze Runner Lesson #9 (10% Step) – Starry Night.....	284
8.5 Sun (Mission Lighting).....	285
8.5.1 Sun Features.....	285
8.5.2 Shadows and Sun Direction.....	286
Better Lighting.....	286
Azimuth and Elevation.....	286
8.5.3 Color and Ambient Parameters.....	287
8.5.4 Multiple Suns?.....	288
8.5.5 No Sun?.....	288
8.5.6 Maze Runner Lesson #10 (10% Step) – Low Lighting.....	288
8.6 Precipitation and Lightning.....	288
8.6.1 Precipitation Features.....	289
8.6.2 Lightning Features.....	289
8.6.3 Let There Be Rain.....	290
Precipitation Density.....	290
Precipitation Velocity.....	290
Varying Drop Colors.....	290
Precipitation Media.....	290
8.6.4 It Was a Dark and Stormy Night.....	291
8.6.5 Lightning Strikes!.....	291
Lightning Color.....	292
Leaning Lightning?.....	292
Ooh... Pretty Lightning!.....	292
Two Ways to Create Lightning.....	292
Generated Lightning (Lightning Objects).....	292
Textured Lightning (WeatherLightning Objects).....	293
Lightning Features Revisited.....	294
WeatherLightning Features Revisited.....	294
8.6.6 Maze Runner Lesson #11 (10% Step) – Stormy Weather.....	294
Adding the Rain.....	294
Adding the Lightning and Thunder.....	296
8.7 Audio Emitters.....	296
8.7.1 Audio Emitter Features.....	296
8.7.2 2D Sound.....	297
2D Gain.....	297
Looping.....	298
Loop Gaps.....	298
2D Visual Feedback.....	298

8.7.3 3D Sound.....	299
Sound Zones and Sound Cones.....	299
Zone A – Inner Cone.....	299
Zone B – Outer Cone.....	300
Zone C – Outside Volume.....	300
Zone D – Beyond maxDistance.....	300
3D Visual Feedback.....	301
Audio Descriptions and Profiles.....	302
8.7.4 3D Emitter Examples.....	302
8.8 Particle Emitter Nodes.....	302
8.8.1 What Is a Particle Emitter Node?.....	303
8.8.2 Particle Emitter Data Blocks.....	304
8.8.3 ParticleEmitterNodeData (PEND) Datablock Parameters.....	305
8.8.4 ParticleEmitterData (PED) Datablock Parameters.....	305
8.8.5 ParticleData (PD) Datablock Parameters.....	305
8.8.6 PEN Parameters.....	305
8.8.7 PEN Equations.....	305
Particle Initial Velocity.....	308
Particle Post-Ejection Velocity Changes.....	308
Particle Lifetime.....	309
8.8.8 Particle Interpolations.....	309
8.8.9 PEN Lifetimes.....	310
8.8.10 PEN Particle Ejection Frequency.....	310
8.8.11 Theta and Phi Explained.....	311
thetaMin and theatMax.....	312
phiReferenceVel and phiVariance.....	312
8.8.12 Orientation Explained.....	312
8.8.13 Animated Textures.....	313
8.8.14 Multiple Particles?.....	313
8.8.15 Holy Popping Particles!.....	314
8.8.16 Can I Mount Emitters?.....	314
8.8.17 Can I Move Emitters?.....	314
8.8.18 Maze Runner Lesson #12 (90% Step) – Teleport Station Effect.....	315
Copy Required Files.....	315
ParticleData (TeleportStation_PD0).....	315
ParticleEmitterData (TeleportStation_PED0).....	316
Duplicate Datablocks.....	316
Testing the Emitters.....	317
8.9 fxShapeReplicator & fxFoliageReplicator.....	318
8.9.1 Replicator Features.....	318
8.9.2 Placing Replicators.....	318
8.9.3 Replicator Visual Feedback.....	319
8.9.4 Seeds.....	319
8.9.5 Replicant Count.....	319
8.9.6 Placement Restrictions (Restrains).....	319
Interactions Must Be True for Collisions.....	320
8.9.7 Retries.....	320
8.9.8 Foliage Dimensions.....	321
8.9.9 Shape Dimensions and Rotation.....	322
8.9.10 Foliage Culling.....	322
View Culling.....	322
Quadculling.....	322
Configuring (Quad) Culling.....	323
To Cull or Not to Cull.....	323
Selecting a CullResolution.....	323
Testing Efficiency of Culling.....	324
Other Culling Features.....	324

8.9.11 Foliage Animation.....	326
8.9.12 Foliage Lighting.....	326
8.10 fxSunlight.....	326
8.10.1 fxSunlight Features.....	327
8.10.2 Adding a New fxSunlight.....	327
8.10.3 Changing the Sun Images.....	327
8.10.4 Positioning the Sun (Render Position).....	328
8.10.5 Changing Lens Flare Effects.....	328
8.10.6 Animating the Sun and Lens Flare.....	329
Animation Overview.....	329
8.10.7 Maze Runner Lesson #13 (10% Step) – Celestial Bodies.....	332
Loading the Celestial Bodies.....	332
Dying Star.....	332
Far Planet.....	332
Near Moon.....	332
8.11 Physical Zones (P-zones).....	333
8.11.1 velocityMod.....	333
8.11.2 gravityMod.....	333
8.11.3 appliedForce.....	334
8.11.4 Maze Runner Lesson #14 (90% Step) – Teleport Stopper.....	334
8.12 fxLight.....	335
8.12.1 fxLight New Features.....	335
8.12.2 fxLight Sample.....	335
8.13 Paths and Markers.....	336
8.13.1 Path Object.....	336
isLooping.....	336
getPathID().....	336
Limited Number of Markers?.....	336
8.13.2 Marker Object.....	336
Proper Creation of Path.....	337
8.14 Triggers.....	338
8.14.1 Placing a Trigger.....	338
8.14.2 Trigger Scripting.....	339
Trigger Datablocks.....	339
Trigger Callbacks.....	339
Group Triggers.....	340
8.14.3 Maze Runner Lesson #15 (90% Step) – Teleport Triggers.....	340
Trigger Datablocks.....	340
Teleport Scripts.....	341
Teleport Trigger Planning.....	341
Teleport Trigger Implementation.....	341
Trigger Callbacks.....	342
onEnterTrigger().....	342
onLeaveTrigger().....	343
Tricky Bits.....	343
Trigger Cleanup.....	344
8.15 Mission Objects Summary.....	344
 9 Game Setup Scripting.....	 347
9.1 SimSet.....	347
9.2 SimGroup.....	350
9.3 ScriptObjects and ScriptGroups.....	351
9.3.1 ScriptObject.....	352
9.3.2 ScriptGroup.....	352
It's an Object.....	353
They Support Namespaces.....	353
Callbacks, Too?.....	355

Not Networked.....	356
9.4 Device Inputs and Action Maps.....	356
9.4.1 Defining Action Maps.....	357
Binding Inputs to Actions.....	357
Bind Samples.....	360
Multiple Binds.....	360
Overriding Binds.....	361
Unbinding.....	361
Saving Binds.....	361
Activating Action Maps.....	362
Deactivating the GlobalActionMap.....	362
Nonglobal Action Map Stack.....	362
9.4.2 Maze Runner Lesson #16 (90% Step) – MoveMap.....	363
Required Behavior.....	363
MoveMap.....	363
Making Our Changes.....	364
9.5 File I/O.....	364
9.5.1 Locating Files.....	364
findFirstFile().....	365
findNextFile().....	365
9.5.2 Wildcards.....	366
9.5.3 Counting Files.....	366
9.5.4 Calculating File CRC.....	366
9.5.5 Filename Expansion.....	367
The Slash(/) versus the Dot (.) versus the Tilde (~).....	367
9.5.6 Filename Subelements.....	367
Extracting File Path.....	367
Extracting File Name.....	367
Extracting Prefix.....	368
Extracting Suffix.....	368
9.5.7 Before Reading or Writing.....	368
Is It a Valid File?.....	368
Can I Write to It?.....	368
9.5.8 Reading Files.....	369
9.5.9 Writing Files.....	370
Overwriting Files.....	370
Appending to Files.....	371
9.5.10 Maze Runner Lesson #17 (90% Step) – Level Loader.....	371
Copy Required Files.....	372
Levels Versus Layers.....	372
Level Files.....	372
Level File Format.....	372
Tokens.....	373
Level-Loader Mechanics.....	374
Level-Loader Definition.....	374
Elevations and Level Increments.....	374
Classifying Tokens.....	374
buildLevel().....	375
layOutBlocks().....	378
Temporary Spawn Point.....	378
Testing the Level Loader.....	379
9.6 Compiling and Executing Files.....	379
9.6.1 Compiling.....	379
9.6.2 Executing.....	380
9.7 Game Setup Scripting Summary.....	380
 10 Gameplay Scripting.....	 383

10.1 Callbacks.....	383
10.1.1 onAdd() and onRemove().....	383
10.1.2 onCollision().....	385
10.1.3 onWake() and onSleep().....	385
10.1.4 create().....	386
10.1.5 onEnterTrigger() and onLeaveTrigger().....	386
10.2 Event Scheduling.....	386
10.2.1 Motivation and Concepts.....	386
10.2.2 Scheduling Our Own Events.....	387
The schedule() Function.....	387
The schedule() Method.....	388
10.2.3 Checking For and Cancelling Pending Events.....	389
isEventPending().....	389
Event Times.....	389
cancel().....	390
10.2.4 Event Scheduling and Accuracy.....	390
Repeating an Event.....	391
10.3 Manipulating Strings.....	392
10.3.1 Words.....	392
10.3.2 Tokens.....	393
10.3.3 Records.....	394
10.3.4 Fields.....	395
10.3.5 Conversion.....	396
10.3.6 Metrics.....	396
10.3.7 Searching and Replacing.....	396
10.3.8 Comparisons.....	398
10.3.9 Trimming and Stripping.....	399
10.4 Scripted Math.....	400
10.4.1 Floating-Point Arithmetic.....	400
10.4.2 Trigonometric Functions.....	400
10.4.3 Vectors.....	400
10.4.4 Matrices.....	400
10.4.5 Quadratics and Cubics.....	401
10.4.6 Miscellaneous.....	404
Centroids.....	404
Random Numbers.....	404
Initializing the Random Number Generator.....	404
Getting Random Values.....	404
Floating-Point Manipulation.....	405
10.4.7 Maze Runner Lesson #18 (90% Step) – Game Events.....	406
Fade Blocks.....	406
fadePass().....	406
fadeStep().....	407
Fireballs.....	409
firePass().....	409
doFire().....	409
10.5 Dynamic Scripting.....	410
10.5.1 Square Brackets [].....	411
10.5.2 Precedence Operators ().....	412
10.5.3 eval().....	413
10.5.4 call().....	414
10.6 Basic Client-Server Communications.....	414
Client -> Server Commands.....	415
Server -> Client Commands.....	416
10.6.3 The Takeaway.....	417
10.6.4 Waving Sample Solution.....	417
10.7 Summary.....	418

11 Special Effects.....	419
11.1 Debris.....	419
11.1.1 Debris and DebrisData Features.....	419
11.1.2 Rendering.....	420
2D Debris (Particle).....	420
3D Debris (Shape).....	420
11.1.3 Physical Properties.....	420
Starting Radius.....	420
Bouncing.....	421
Sliding.....	421
Velocity and Falling.....	422
Spinning.....	422
Lifetime.....	423
11.1.4 Additional Behaviors.....	423
Explosions.....	423
Replace Debris with StaticShape.....	423
Fixing Orientation.....	424
Fireballs, Particle Trails, Etc.....	424
Fading Away.....	424
11.1.5 Using Debris.....	425
Used-by Classes.....	425
Standalone.....	425
11.2 Decals.....	425
11.2.1 DecalManager and DecalData Features.....	426
11.2.2 Decal Properties.....	426
11.2.3 Using Decals.....	426
Used-by Classes.....	427
11.3 Explosions.....	427
11.3.1 Building up an Explosion.....	427
General Control.....	427
Post-Creation Play Start Time.....	427
Explosion End Time and Play Speed.....	428
Initial and Subsequent Scaling.....	428
Facing.....	429
Initial Offset.....	429
11.3.2 Particles.....	430
Standalone Emitter.....	430
Those Other Emitters.....	430
11.3.3 Explosion Shape.....	431
11.3.4 Debris.....	431
11.3.5 Lighting Effects.....	432
11.3.6 Camera Shake.....	432
11.3.7 Sound.....	433
11.3.8 Subexplosions.....	433
11.3.9 Thinking about Damage.....	433
11.3.10 Using Explosions.....	434
Used-by Classes.....	434
Standalone.....	434
11.3.11 Maze Runner Lesson #19 (10% Step) – FireBall Explosion.....	434
FireBallExplosionParticle.....	435
FireBallExplosionEmitter.....	436
FireBallExplosion.....	436
11.4 Projectiles.....	437
11.4.1 Designing a Projectile.....	437
The Beginning.....	437
The Datablock.....	438

Projectile Representation.....	438
Shape Animations.....	438
Ballistics and Gravity.....	439
Bouncing Around and Arming Delays.....	439
Particles.....	440
Lit Projectiles.....	440
Explosions.....	440
Splashes.....	441
Bullet Holes.....	441
Sound.....	442
Lifetime and Fading Away.....	442
Inherited and Muzzle Velocities.....	443
11.4.2 Using Projectiles.....	443
Standalone.....	443
11.4.3 Maze Runner Lesson #20 (90% Step) – The FireBall.....	444
FireBallParticle.....	445
FireBallEmitter.....	445
FireBallProjectile.....	446
shootFireBall().....	447
11.5 Sounds.....	447
11.5.1 Sound Dimension.....	448
2D Sounds.....	448
3D Sounds.....	448
11.5.2 AudioDescription and AudioProfile.....	448
AudioDescription.....	449
AudioProfile.....	449
11.5.3 Sound Channels.....	449
11.5.4 Using Sound.....	449
11.5.5 new versus datablock for Profiles/Descriptions.....	450
11.5.6 Maze Runner Lesson #21 (10% Step) – Game Sounds.....	450
The Audio Descriptions.....	450
Nonnetworked Nonlooping 2D Audio Description.....	451
Nonnetworked Looping 2D Audio Description.....	451
Networked Nonlooping 3D Audio Description.....	452
The Audio Profiles.....	452
The Nonlooping GUI Sounds (Splash Screen and Buttons).....	452
The Looping GUI Sound (In-Game Music).....	453
The Networked Sounds (Fireball Firing and Explosion).....	453
Using The Audio Profiles.....	453
11.6 Special Effects Summary.....	454
 12 Standard Torque Game Engine GUI Controls.....	 455
12.1 Standard GUIs.....	455
12.1.1 Interfaces versus GUIs.....	456
12.1.2 The Canvas.....	456
Current Canvas Content.....	456
Dialogues and Layers.....	456
Canvas Extent vs. Screen Size.....	457
12.1.3 The Structure of a .gui File.....	457
Optional Code Block #1.....	458
Interface Definition.....	458
Optional Code Block #2.....	459
General Design of Interfaces.....	459
How a GUI Captures Inputs.....	460
Layers.....	460
First Responders.....	461
Focus.....	461

Modality.....	462
12.2 GUI Profiles.....	462
12.2.1 Visual Attributes of GUI Control Profiles.....	463
